M-4	main-vertical
M-5	tiled
Spc	Cycles through above arrangements.
C-arrow	Resize a pane (slowly)
M-arrow	Resize a pane (quickly)
u	Go backward in this window's layout history (repeatable)
U	Go forward in this window's layout history (repeatable)

Windows

Key	Function
c	Create a new window
0...9	Switch to window 0, 1, ..., 9
'	Select window (prompt for index)
.	Give current window a new index
f	Find window whose title matches selected glob
,	Rename current window
&	Kill current window
M-n	Next window that has seen activity
M-p OR Tab	Previous window that has seen activity
l	Change focus to last window
n	Change focus to next window
p	Change focus to previous window
w	Choose window from interactive list

On the command line

```
tmux new-session -s session-name
tmux list-sessions
tmux kill-session -t target
```

Tips

- Default prefix is C-b. Changed to C-a
- After C-prefix ?, use / to search for a command; n and N to navigate among results
- Multi-attach to the same session
- Configuration file: ~/.tmux.conf
