

# 🐉 Markdown Mode for Emacs 🐉

## ～ Markup Insertion & Replacement ～

C-c C-s b	bold	C-c C-s h	heading
C-c C-s i	italic	C-c C-s H	heading (setext)
C-c C-s c	code	C-c C-s #	heading # = 1, 2, ..., 6
C-c C-s C	code block (GFM)	C-c C-s !	heading 1 (setext)
C-c C-s q	blockquote	C-c C-s @	heading 2 (setext)
C-c C-s p	preformatted	C-c C-s -	horizontal rule
C-c C-l	link	C-c C-s f	footnote
C-c C-i	image	C-c C-s w	wiki link
C-c C-k	kill thing at point		

## ～ Lists & Indentation ～

M-<return>	new list item
C-c <up>	move list item up
C-c <down>	move list item down
C-c <right>	indent list item
C-c <left>	exdent list item
C-c >	indent region
C-c <	outdent region

## ～ Cycling & Completion ～

C-c C--	promote element
C-c C-=	demote element
C-c C-]	complete markup
<tab>	cycle subtree visibility
S-<tab>	cycle global visibility

## ～ Navigation & Movement ～

C-c C-n	next visible heading	M-{	backward paragraph
C-c C-p	previous visible heading	M-}	forward paragraph
C-c C-f	forward to same level heading	M-h	mark paragraph
C-c C-b	backward to same level heading	C-M-{	backward block
C-c C-u	move to higher level heading	C-M-}	forward block
M-n	next link	C-c M-h	mark block
M-p	previous link	C-c C-d	markdown-do
C-c C-o	follow link at point		

## ～ Utility Commands & Toggles ～

Run `markdown-command` on file `basename.text` and do various things with the output:

C-c C-c m	<i>Markdown</i> : show output in other window
C-c C-c p	<i>Preview</i> : save to temporary file and open in browser
C-c C-c e	<i>Export</i> : export to <code>basename.xhtml</code>
C-c C-c v	<i>View</i> : export to <code>basename.xhtml</code> and open in browser
C-c C-c w	<i>Kill ring save</i> : copy output to clipboard
C-c C-c o	<i>Open</i> : open <code>basename.text</code> with <code>markdown-open-command</code>

These commands operate on the entire buffer:

C-c C-c ]	complete headings and horizontal rules
C-c C-c c	check for undefined references
C-c C-c n	renumber ordered lists

Toggle commands are located under the C-c C-x prefix:

C-c C-x C-m	Markup hiding	C-c C-x C-e	Math support
C-c C-x C-l	URL hiding	C-c C-x C-i	Inline images
C-c C-x C-f	Native code block font lock	C-c C-x C-x	GFM checkbox
